

Leadership Agility

The Key Competency for Mastering the New Economy

Leadership Agility is about knowing **what to do**,
when you **don't know** what to do.

OVERVIEW

Business is looking better for your organization, but you are still in a precarious state.

- The business restructured last year and tried to minimize the impact on people, but your managers and employees are still feeling the effects.
- Now you need everyone on-board and acting as a team to take advantage of the recent upturn in the economy, because who knows if it will last?
- More than ever, your business and people strategies need to be flexible: able to build for the future knowing that the economy could take a turn for the worse at any time.
